# A Symbol to Ward Off Entities

Figure 4

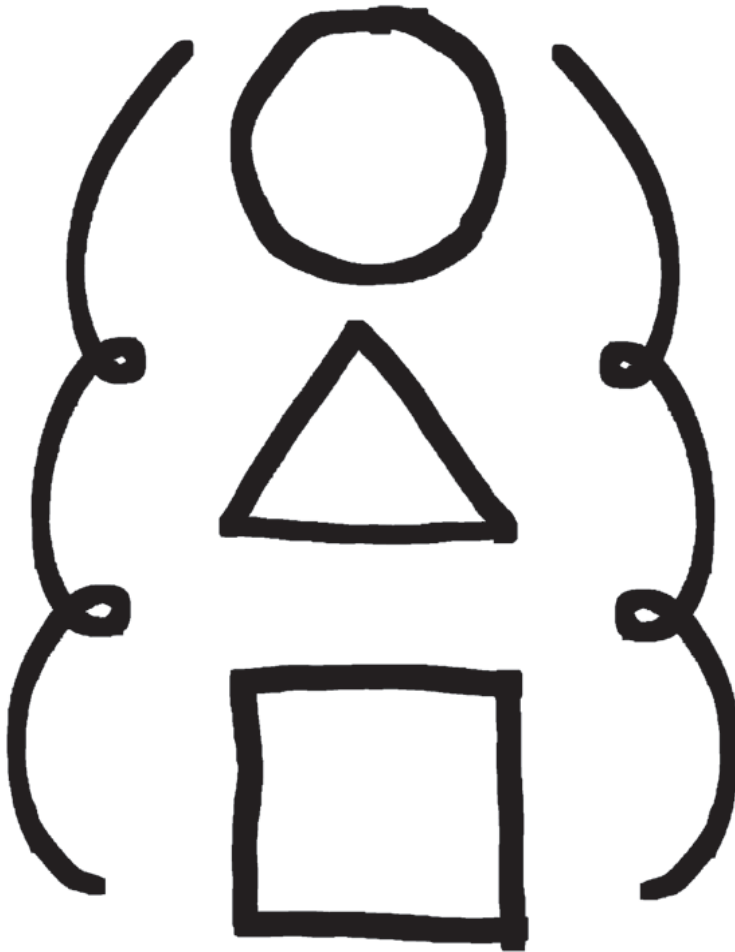

This simple piece of jewelry protects the wearer from stray entities. The Circle Triangle Square (in this order, any other order is not this symbol), can be drawn on the body, or made into a piece of jewelry like this. The advantage of the Jewelry is it's resilience to washing and abrasion. This little object protects the wearer from entities trying to enter the body but does not extract stray entities that have already entered the body. See figure 5 for this.

---

# A Symbol to Remove Entities

Figure 5

We suggest making a copy of this symbol and leaving off all other writing on the page front or back. The Procedure is as follow:

First Have the subject lie down on the back, facing east (Part 5-Day 2 of the course begins with more about this). Next, hold the paper with symbol so it faces the subject's body. Always have the circle at the top of the design and move it in little circles over the subject's body. Do this while asking within, to free that spirit from body... from the earth plane, and to give it a taste of love light and peace, like it has never known on earth, and to release it to the universal will. Do this about 7 or 8 minutes then flip the page over so the symbol faces away from the subjects body, and do the same thing again for about 7 or 8 minutes. After receiving an Exorcism, people often describe a feeling of lightness and relief.

---

## The Chi Symbol

This ancient character depicts a person connected to Heaven through word or action.

It was said that connecting to ones purpose through word or action would channel vast amounts of energy to fully incarnate the physical body. Conversely; words and actions not aligned with ones purpose on Earth, would degenerate the physical body, resulting in sickness and eventually death, disincarnation.
